

$$v_1 = (1, F_1, T_1)$$

$$v_2 = (2, F_2, T_2)$$

$$v_4 = (4, F_4, T_4)$$

$G = (V, E)$ – digraf ponderat al rețelei rutiere
 $v = (id, F, T)$, $id \in N$
 $F \in \{0, 1\}^n$ – fanioane (proprietăți infrastructură)
 $T \in (Q_+ \setminus \{+\infty\})^m$ – timpi de semaforizare
 $e = (v_i, v_j, w) \in E$
 $w = f(d, \rho, s, c)$ – cost muchie (distanță, densitate, viteză, factori de congestie/control)
